

*Left: New to the Insert range of drilling and dowel insertion machines from Omal is the Insert 1300 HV. In addition to the drilling, gluing and dowel insertion unit, the machine is equipped with a vertical spindle for face drilling. The Insert 1300 HV enables any type of vertical boring up to 40mm from the edge to be carried out. All holes that are required for assembly can be drilled in one pass, saving production time. The Insert range is available from Machine Sales. Call 0113 256 8883.*
